

**Problem Statement:**

Learning loss is a major problem in US K-12 education, with some students falling multiple grade levels behind their peers and experiencing instruction that may not prioritize student content engagement. Livestream Learning Studio delivers live educational enrichment and theatrical performances through virtual programs, lessons (incl. Literacy and STEM), and real-time student interaction. Live events focus on student content engagement with the goal of creating more positive student learning outcomes.

Announcing our ESSA IV certification!

<sup>1</sup> Livestream Events are 30 minute (on average) virtual and interactive programs and lessons delivered live to schools using arts-integrated and theatrical performance. Events that focus on Literacy are prioritized in grades K-2 while those that focus on STEM are prioritized in grades 3-5.

<sup>2</sup> Livestream Learning Studio supports social emotional learning (SEL) teaching strategies by aligning virtual content and follow-up lessons with the five core competencies of the CASEL SEL Framework (self-awareness, self-management, social awareness, relationship skills, and responsible decision-making).
